

Coffee with the Colossus: Giants of Greece

Among the most iconic Giants were the Cyclops, colossal beings with a single piercing eye in the middle of their forehead. These master craftsmen resided in volcanic caves, where they forged potent weapons and tools for the gods, including thunderbolts for Zeus and a helmet that made Hades invisible.

Their most famous encounter occurred when Odysseus and his crew stumbled upon their island. With cunning and bravery, Odysseus outwitted the monstrous Cyclops Polyphemus, blinding him in one eye and securing the release of his companions.

Even more formidable than the Cyclops were the Titans, primordial giants who ruled the world before the Olympians. Led by their cunning leader, Cronus, they overthrew their father, Uranus, the god of the sky. However, they faced a fierce challenge from the younger Olympians, who emerged victorious in a cataclysmic battle known as the Titanomachy.
