**Unjust: Social Movements, Inequality, and the Deep Roots of Climate Change By Kate Aronoff, Alyssa Battistoni, Daniel Aldana Cohen, Thea Riofrancos**

**Unjust is a powerful and urgent book that exposes the deep roots of climate change in inequality and social injustice. Through incisive analysis and powerful storytelling, the authors show how the systems that have created the climate crisis are also the same systems that perpetuate inequality and oppression.**

The book is divided into three parts. The first part, "The Roots of Injustice," explores the historical origins of the climate crisis, showing how the Industrial Revolution and the rise of capitalism set the stage for the environmental destruction that we are experiencing today. The second part, "The Impacts of Injustice," examines the devastating effects of climate change on people and communities around the world, with a particular focus on the most vulnerable and marginalized. The third part, "The Fight for Justice," offers a glimmer of hope, showing how social movements are fighting back against climate change and injustice, and building a more just and sustainable world.
