

# Teaching Reading and Writing: The Developmental Approach

When it comes to teaching reading and writing, there is no one-size-fits-all approach. Every child learns differently, and what works for one may not work for another. That's why it's important to use a developmental approach that takes into account each child's individual needs.

The developmental approach to teaching reading and writing is based on the idea that children learn best when they are taught in a way that is appropriate for their developmental stage. This means that the activities and strategies you use should be tailored to the child's age, abilities, and interests.

There are five key stages in the developmental approach to teaching reading and writing:

1. **Emergent literacy:** This stage begins at birth and lasts until around age 5. During this stage, children begin to develop the skills that will eventually lead to reading and writing. They start to recognize letters,

sounds, and words. They also begin to experiment with writing, scribbling, and drawing.

2. **Beginning reading:** This stage begins around age 5 and lasts until around age 7. During this stage, children begin to learn how to decode words and read simple texts. They also begin to develop their comprehension skills.
3. **Fluent reading:** This stage begins around age 7 and lasts until around age 9. During this stage, children become more fluent in their reading. They can read more quickly and accurately, and they have a better understanding of what they read.
4. **Advanced reading:** This stage begins around age 9 and lasts until around age 12. During this stage, children continue to develop their reading skills. They become more critical readers, and they are able to understand more complex texts.
5. **Expert reading:** This stage begins around age 12 and lasts throughout adulthood. During this stage, readers have a deep understanding of the reading process. They are able to read complex texts quickly and accurately, and they are able to make inferences and draw s from what they read.

The developmental approach to teaching reading and writing is a gradual process. It takes time and patience to help children develop the skills they need to become proficient readers and writers. However, the rewards are great. Children who are taught using a developmental approach are more likely to become successful readers and writers who love to learn.
